Skills

Security: Vulnerability Management, Tenable Nessus, Microsoft Defender, ISO/IEC 27001
Data & Analytics: Microsoft Fabric, Power BI
Programming: Python, TypeScript, SQL
Frameworks & Tools: FastAPI, React, Express, SQLAlchemy, Git
Languages: Chinese (Native), English (Advanced), Turkish (Fluent)

Education

Master's in Information Security, *Stockholm University* *Aug 2024 – Present*
– Relevant Coursework: Network Security, Software Security, Cyber Forensics

Bachelor's in Turkish Language, *Guangdong University of Foreign Studies* *Aug 2019 – Aug 2023*

Professional Experience

Digital Compliance & Assurance Analyst Intern *Feb 2026 – Jun 2026*
UN Global Service Centre (Valencia, Spain)
– Automated security data pipelines in Microsoft Fabric to consolidate vulnerability and asset data from Tenable Nessus and Microsoft Defender, processing 3,000+ IT assets and 90,000+ monthly vulnerability findings while validating data sources, asset ownership, and network-zone information.
– Used Power Query and Python to clean, deduplicate, classify, and analyze vulnerability trends by CVE, CVSS severity, asset type, network zone, business unit, time, and remediation status, identifying recurring high-risk exposures, patch delays, and systemic control weaknesses.
– Built Power BI dashboards to monitor vulnerability exposure, patch compliance, remediation progress, SLA status, and security tool coverage, supporting continuous monitoring and risk-based vulnerability prioritization.
– Coordinated with infrastructure, network, IT support, and other data-source teams to define required data fields, resolve data-quality issues, and standardize source-data preparation; developed dashboard user guidance and operational documentation referencing ISO/IEC 27001:2022 security requirements.

Turkish Operation Specialist, *Kumai Tech (Guangzhou, China)* *May 2023 – Jul 2024*
– Analyzed business and user-behavior data to identify growth opportunities and operational trends.
– Planned and executed community campaigns and social media initiatives.
– Managed operational workflows and coordinated with technical and design teams to resolve user issues and improve processes.

Turkish Operation Intern, *Hello Group Inc. (Beijing, China)* *Jan 2023 – May 2023*
– Conducted competitor and product analysis and produced multilingual reports.
– Coordinated cross-functional issue resolution by translating operational needs into actionable tasks.

Project

My Adventure, *Full-stack Interactive Story Game* *Site*
– Developed a React and TypeScript frontend with Vite, implementing story generation requests, job-status polling, loading and error states, and choice-based navigation through branching stories.
– Built backend APIs with FastAPI and SQLAlchemy, implementing background generation jobs and database storage for stories, nodes, and job statuses.
– Integrated Hugging Face inference APIs and designed prompts to generate branching stories with multiple endings from user-provided themes, parsing outputs into structured nodes for interactive gameplay.
